Telephone: 07462531883; Email: nahidshakib@outlook.com
Right to Work: British citizen, having full right to work

Professional profile:

Motivated and Driven IT Professional

Recent graduate of an AI-driven Software Engineering bootcamp at Skills City. I am transitioning into the IT sector with a wealth of transferable skills in decision-making, problem-solving, communication, and teamwork, cultivated through my previous career experiences.

As a career changer, I am bringing a fresh perspective and a strong commitment to success in the tech industry. I developed proficiency in Python, databases, Django, React, HTML, CSS, JavaScript, AI, ML, cloud, OOP and Prompt Engineering. Midway through the program, I already have successfully created web pages, resolved bugs, and troubleshooted Django setup issues in collaboration with technical instructors.

My passion for technology and my enthusiasm for this career transition drive me to continuously learn and improve. I achieved outstanding grade in bootcamp, have engineering degree in other discipline, so I am confident in my ability to quickly adapt and grow, with the goal of becoming an established IT professional within the next 2 to 5 years.

I am available to start any full-time or part time remote roles with or without occasional travel to workplace.

My Portfolio: https://github.com/NahidKakon/portfolio.git

Key IT skills:

- HTML
- CSS
- Python
- JavaScript
- DJANGO
- React
- SQL
- SQLAlchemy
- DATABASE Concepts
- DevOp
- Artificial Intelligence
- Next.js
- Machine Learning techniques
- Analytical thinking
- LLM Prompt Engineering
- Microsoft Azure Portal
- Confident PC skills

Key Transferable Skills:

- MS office (word, excel, power point, outlook)
- Drawing (used before Gerber CAD, Auto CAD, Paint 3D, Photoshop)
- Teaching and guiding
- Report writing
- Requirement analysis
- Decision making
- Planning
- Problem solving
- Leadership
- Quick learner
- Quality assurance
- Communication skill at all levels
- Ability to see bigger picture
- User of various extranet software (eg. PLM, Lighthouse, Interlink, OneSource, CMS, FirstReact etc.)
- Working with strict Deadline

Career summary

June 2024 – Present

AI Driven Software Engineering Bootcamp – Skills City
A course which provides the building blocks and advance technical skills needed to work in Software Engineering. The program introduces various Software Engineering concepts and the opportunity to discover theory by exploring subjects online. The bootcamp also provides scope to practise and apply knowledge, completed industry project for Phoenix Software.

The course content includes:
